

Santo André beach clean-ups (Portugal)

Santo André Beach Cleanups started in 2006. These campaigns involve several institutions and over 100 participants each year. 2011 was a record year, with 200 participants.

These campaigns are always advertised and promoted at local schools and among the population by local radio and newspapers, as well as through other promotional material.

The tasks are distributed by the entities in a previous meeting. In the day of the campaign, the volunteers are transported to the beaches by vehicles of the organization or in their own vehicles. They receive material such as t-shirts, gloves and bags for the garbage.

The beach cleanup occurs during the morning and afternoon. The garbage bags left on the beach are gathered and transported to the landfill. The collection of waste is made by tractor of Parish council of Santo André. The transport to landfill is done by trucks of Municipality of Santiago do Cacém.

Facts
